【Overview】

At the Information Exchange session of the 29th Annual Meeting of the Japanese Academy of Nursing Management, we provided a presentation on the theme 'Co-creation between Clinical Practice and Universities: Establishing a Research Collaboration System Centered on Research Hubs.' We discussed the process of establishing the Kyushu University Nursing Co-Creation and Implementation Research Hub, the development of collaboration systems between clinical practice and the university, and the progress of collaborative research up to the present. From the Department of Health Sciences, we introduced an overview of the hub and its activities, while Kyushu University Hospital presented perspectives from the nursing department and head nurses regarding research collaboration. Finally, we created an opportunity for audience participants to engage in an exchange of opinions.
